

High School Positive Behavioral Interventions & Supports Community of Practice 2016-17

HSCoP #3 March 29, 2017 PBIS in the Secondary Classroom

AGENDA

- Δ Classroom-wide PBIS: PRACTICES
- Δ Supporting and Responding to Behavior Secondary Classroom Practices (Foundation and Prevention)
- Δ Center on Adolescent Research in Schools Classroom Management Manual (Positive Student-Teacher Interactions and De-escalation Strategies)
- Δ Classroom-wide PBIS: SYSTEMS

Facilitated by: Cristy Clouse cristy@pbiscaltac.org

Rolling Outcomes:

Given today's agenda...

- 1 I would like more clarification about......
- 2 Something new I hope to learn........
- 3 I would like to have a deeper understanding about..........
- 4 I would like to feel
- 5 I want to experience......
- 6 I am hoping to leave today with......

Today's essential question:

What are the considerations for high school implementation of PBIS in the classroom?

PBIS in the Classroom: PRACTICES

Adapted from: Roundtable Practice Brief, Chicago Leadership Forum 2016. Supporting and Responding to Behavior, TA Document, 2015. CARS Classroom Manual, 2014.

Critical Elements

Positive Behavioral Interventions and Supports (PBIS) is a multi-tiered framework for supporting student behavior to improve educational outcomes for all students (Horner & Sugai, 2015). The PBIS framework organizes evidence-based practices within a continuum of support, which is typically operationalized with three tiers. Tier 1 of the PBIS framework focuses on supporting all students with high quality implementation of evidence-based prevention and intervention practices (e.g., explicitly teaching a small number of positively stated expectations, recognizing students for meeting or exceeding expectations). In schools that effectively implement PBIS, 80% or more of students will respond to Tier 1 supports without additional intervention. Tier 2 of the PBIS framework focuses on targeted interventions for students whose behaviors are not responsive to Tier 1 supports. In schools that effectively implement PBIS, 10-15% of students may need Tier 2 level intervention in addition to Tier 1. For students whose behaviors do not respond to Tier 1 or Tier 2 targeted interventions, Tier 3 interventions are put in place. Tier 3 interventions are intensive and individualized. In schools that effectively implement PBIS, approximately 5% of students may require Tier 3 level of intervention.

The PBIS framework has significant implications for the classroom environment. PBIS in the classroom, or Positive Classroom Behavioral Supports (PCBS), refers to and proactive classroom management supports for all students. This includes effectively teaching an evidence-based core curriculum and establishing, teaching, and reinforcing positive behavioral expectations. To provide consistency for students across classrooms and contexts, PCBS is linked to the School-Wide framework (Simonsen & Freeman, 2015). When students do not respond to agreed upon classroom expectations, teachers respond to student behaviors in a way that maintains respect and a focus on instruction. In classrooms where PBIS is implemented effectively, the environment is predictable, consistent, and conducive to academic and behavioral success. The sections below describe critical elements of PBIS in the classroom including (1) core practices for implementation, (b) systems to support teachers with implementation, and (3) relevant outcomes.

Practices

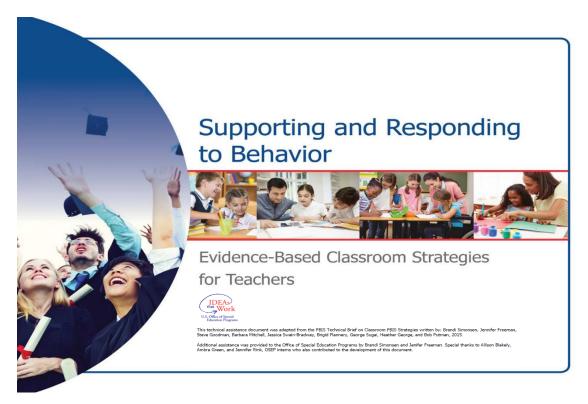

The single best way to address challenging behaviors in the classroom is to take steps to make sure they never occur. While there is no panacea for preventing challenging behaviors, there are several research-validated practices. To effectively and efficiently implement PBIS in the classroom, there are commonly agreed upon foundational, prevention and response practices that need to be put in place. These practices focus on establishing a safe and predictable classroom structure and positive teacher-student interactions

Foundational Practices include: Setting, Routines, Expectations

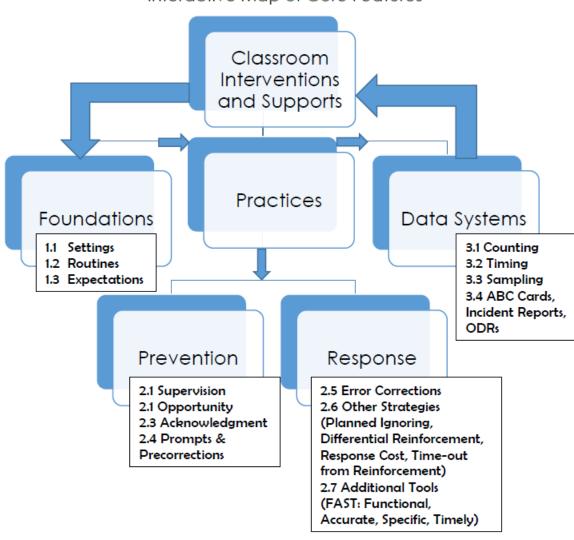

Prevention Practices include: Supervision, Opportunity, Acknowledgement, Prompts & Precorrections

Response Practices include: Error Correction, FAST Method, De-escalation Strategies

Interactive Map of Core Features

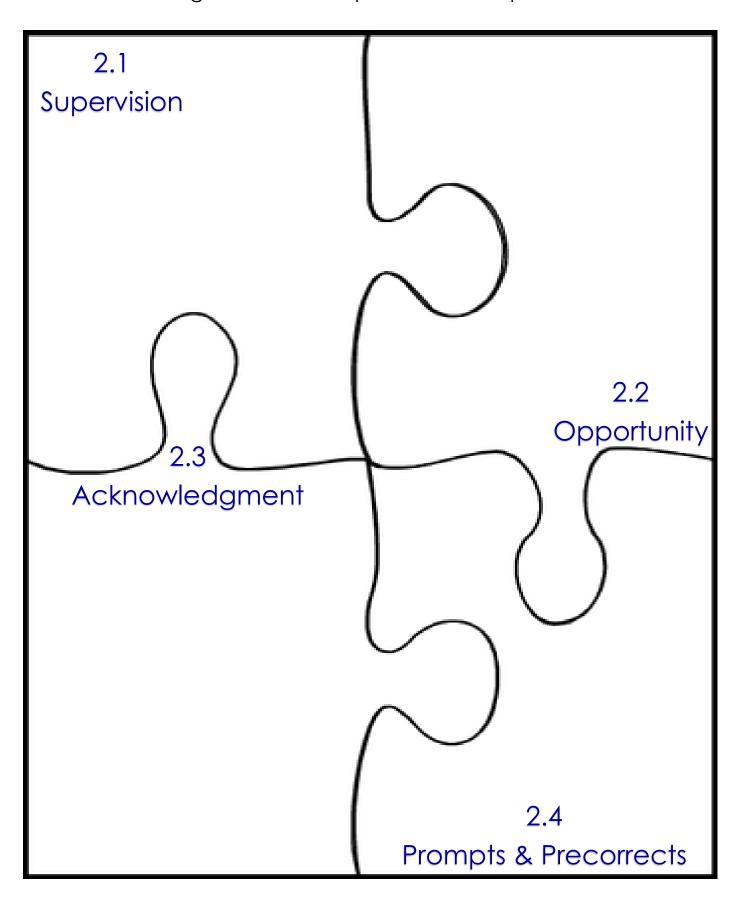

SECONDARY FOUNDATIONS

| 1.1 SETTINGS: Effectively design the physical environment of the classroom | | | | |
|--|---|---|--|--|
| DESCRIPTION AND CRITICAL FEATURES "What key strategies can I use to support behavior in my classroom?" | EXAMPLES "How can I use this practice in my classroom?" | NONEXAMPLES "What should I avoid when I'm implementing this practice? | EMPIRICAL SUPPORT and RESOURCES What evidence supports this practice, and where can I find additional resources?" | |
| Design classroom to facilitate the most typical instructional activities. Arrange furniture to allow for smooth teacher and student movement. Assure instructional materials are neat, orderly, and ready to use. Post materials that support critical content and learning strategies. | Design classroom layout according to the type of activity taking place: 1.circles for discussion 2.forward facing for group instruction Use assigned seats Be sure all students can be seen Consider options for storage of students' personal items | Equipment and materials are damaged, unsafe, and/or not in sufficient working condition or not accessible to all students. Disorderly, messy, unclean, and/or visually unappealing environment Some students or parts of the room not visible to teacher Congestion in high-traffic areas. | Teachers can prevent many instances of problem behavior and minimize disruptions by strategically planning the arrangement of the physical environment. (1) Arranging classroom environment to deliver instruction in a way that promotes learning. Positive Student-Teacher Interaction

Positive interactions between teachers and their students play an important role in determining student success. Research shows that increasing positive interactions (e.g., praise statements) and decreasing negative interactions improves the classroom climate as well as student academic and behavioral outcomes. In general, a positive relationship with teachers boosts student motivation and cooperation. Interacting with students in a positive way teaches students valuable interpersonal skills as well. The ratio of positive to negative teacher statements to students should be 4:1.

Increasing praise statements to acknowledge appropriate behaviors, using error correction procedures to address misbehavior, and practicing active supervision (e.g., circulating, scanning, encouraging) are strategies teachers can employ to improve student-teacher interactions. Providing choices can also help to improve relationships with students as it gives students a sense of control and may stop challenging behaviors. In addition, giving students choices provides teachers with a chance to make a praise statement about the change in behavior.

Teachers may initially report that increasing praise statements feels unnatural or contrived. Help teachers set personal goals to increase praise statements throughout the class period. Improving interactions with students will take time and practice! Increasing positivity will improve student behavior and may improve teacher outlook as well.

Following are examples of the three types of feedback that can be given to students:

Praise Statements

Students with emotional and behavioral difficulties may not hear very many praise statements at home, at school, or in other settings. Praise statements should be specific and genuine. It is helpful to tie praise statements to behavioral expectations to increase the likelihood students will repeat the desired behavior. By focusing on what the students do correctly, students feel competent and confident about their ability to do what is expected. Using the student's name when making praise statements personalizes the message: "You did a great job participating in class today, Alex. Keep up the great work!"

High school students with emotional and behavioral difficulties may feel uncomfortable receiving public praise. Be sensitive to student wishes. Consider delivering praise privately in a quiet tone or non-verbal praise such as smiles, nods, high-fives or other gestures. Furthermore, positive notes can be written on homework, tests, or on scrap paper and delivered privately.

<u>Pithy statements such as —Good work II are not sufficient.</u> In addition, avoid —back-handed praise II such as —You didn't mess up as badly as you did yesterday. II Such comments may lessen desired outcomes.

Corrective Statements

The primary purpose of error correction is to assist the student in performing the correct response when a behavior is incorrect or unacceptable. Error correction is not punishment. For high school students, it is important to provide corrective feedback privately and quietly to avoid embarrassing the student or triggering an escalated behavior to —save face.

| Using a neutral tone of voice and facial expression, inform the student his or her response was incorrect. | "Please stop. Calling out in class is not acceptable." "Hold on for one moment. That voice volume is too loud." |
|--|---|
| 2. Tell the student what you want him or her to DO. If the error was an inappropriate behavior, is helpful to tie your feedback to a classroom expectation or routine. | "Please remember to raise your hand to share your answer." "Please use a quiet voice like mine so I can understand better what it is that you need." |
| 3. Immediately reinforce the student for demonstrating the correct behavior. This is very important! | "Thank you for your quiet raised hand! What would you like to share with the class?" "Thank you for using a quieter tone. Now I can hear what you have to say." |

Negative Statements

Negative interactions with students can be extremely detrimental to student esteem and contribute to disengagement with school.

1.

When students engage in inappropriate behaviors to gain attention or escape a task, teachers may respond with negative feedback "You're late", "You're not listening again" A direction to stop a behavior -- "I said stop that!", "Quiet!"

A derogatory comment-- "Only stupid people do that"

In addition, teachers may provoke students with sarcasm during times when no misbehavior is occurring. These negative interactions can escalate student behavior and create a coercive cycle.

It is important for teachers to treat students with emotional and behavioral difficulties with dignity and respect at all times, even when student behavior is particularly challenging.

Ways to Enhance Positive Student-Teacher Interactions

Active Supervision

Active supervision promotes the development of a positive classroom climate by proactively encouraging and maintaining student on-task behaviors. Active supervision of students is characterized by patterns of teacher movement and high rates of positive interactions with students, including praise statements and error correction.

Circulating

Circulation in the classroom provides teachers increased opportunities to praise students for ontask behavior, error correction, and encouragement. Teachers should use proximity to check in with students during independent and group work.

Scanning

Frequent visual scanning of the classroom environment is a good way for teachers to observe student behavior related to expectations and routines. General statements of praise or error correction can be made:

"I really like how everyone is on task right now. Great work!" "I see students working well in groups together. Excellent!"

"I'd like all students to stop. Please remember the homework routine. Homework goes in the blue bin."

Encouraging

Similar to praise statements, words of encouragement are important messages for students who have emotional and behavioral difficulties. Provide encouragement when students are struggling or have completed a task. Also encourage students to encourage each other! Then be sure to provide students with the appropriate supports (e.g., accommodations) to increase success.

Choices

Providing choices can help redirect undesired behavior and create an opportunity for praise and/or encouragement. When students make a choice to follow expectations, remember to reinforce the appropriate behavior to increase the likelihood that students will repeat the desired behavior.

"I see you have not started your math work. Would you like to use scrap paper or graph paper to help you figure the problems?"
(Student makes choice and starts to work).

"I'm glad to see you on-task now. Raise your hand if you get stuck, and I will be right over to help you."

Positive Student-Teacher Interactions Worksheet

| | | | | |

DE-ESCALATION STRATEGIES

De-escalation strategies help teachers to:

- identify the stages of behavior escalation for both internalizing and externalizing student behaviors, and
- implement techniques to reduce negative interactions with students who exhibit a variety of challenging behaviors

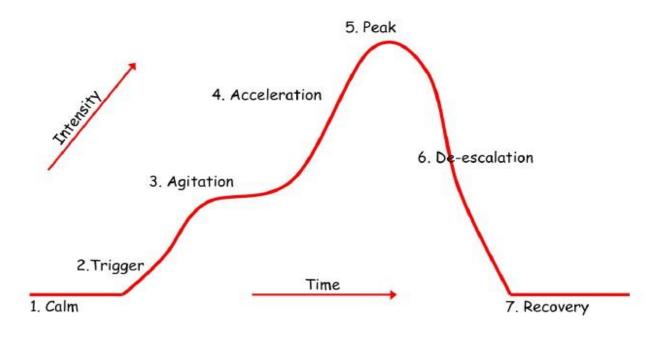

Externalizing or Internalizing?

Emotional and behavioral problems may be manifested as **externalizing** or **internalizing**. Externalizing behaviors, generally easily identified by teachers, are problematic student behaviors that are externally directed. Internalizing behaviors may be more difficult to recognize in students. As the name suggests, internalizing behaviors are inward patterns of negative thinking and behavior which may stem from depression and anxiety.

| INTERNALIZING | EXTERNALIZING | | |
|--|----------------------------|--|--|
| Withdrawn behavior | Anti-social behavior | | |
| Avoidance of peers and | Verbal aggression | | |
| adults Refusal to speak | Physical aggression | | |
| Separation anxiety | Arguing and non-compliance | | |
| -Shutting down and/or | | | |
| crying Hiding face, head | | | |
| ACROSS TYPES | | | |
| Substance misuse or abuse, anxiety disorders and depression, | | | |
| suicidal thoughts or attempts, dropout of school, poor post-school | | | |

Student behaviors can also be characterized as distracting (e.g., calling out, tapping pencils, side-talking with peers) and disruptive (e.g., arguing, non-compliance, cursing) to the instructional environment.

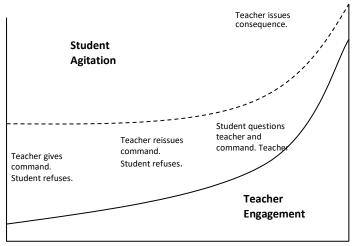

Problem behavior often follows a fairly predictable pattern called the **Acting Out Cycle.** The teacher's response to student behavior at each stage of the Acting Out Cycle can prevent problem behaviors from occurring or reduce the intensity of the student's behavior.

Teacher Responses to Escalated Student Behavior. The figures below illustrate the relationship of student agitation to teacher engagement (Walker & Walker, 1991).

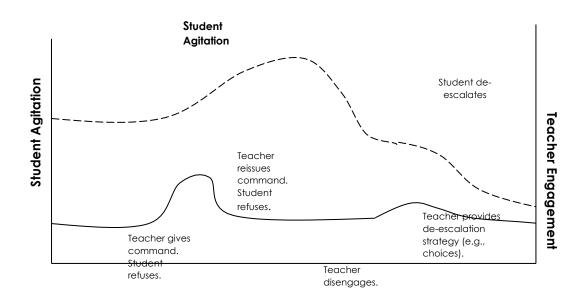

Ineffective Teacher Response

The teacher responds to student disruption by engaging with the student (i.e., issuing command). When the student refuses to comply, the teacher continues to engage (e.g., reissuing a command, asking questions, arguing with the student) which may be perceived by the student as —nagging. Il Both student agitation and teacher engagement accelerate until the student behavior peaks and/or the teacher issues a consequence for the refusal to comply (e.g., directs student to leave). Patterns of interaction such as these interrupt instruction and may leave both

teacher and student feeling frustrated and angry, damaging student- teacher relationships.

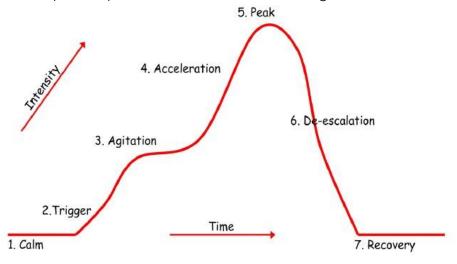

Effective Teacher Response

When the student refuses to comply with the teacher's initial and reissued commands to the disruptive behavior, the teacher disengages temporarily. The strategic re-engagement by the teacher to offer a de-escalation strategy (e.g., choice, use of a calming strategy) results in decreased student agitation. This interaction pattern minimizes interruption and preserves valuable student-teacher rapport. Furthermore, teacher frustration may be red

The Acting Out Cycle

Problem behavior often follows a fairly predictable pattern called the **Acting Out Cycle**. The teacher's response to student behavior at each stage of the Acting Out Cycle can prevent problem behaviors from occurring or reduce the intensity of the student's behavior.

| | | Characteristics of Student Behavior | | Teacher |
|------|---------|---|-----------------|---|
| Step | Phase | INTERNALIZING | EXTERNALIZING | |
| 1 | Calm | Cooperative, follows direct receive corrections | ctions, able to | Positively reinforce for following expectations and routines (e.g., praise) Plan engaging instruction with multiple opportunities to respond |
| 2 | Trigger | Student experiences an unresolved internal or external conflict: School-based triggers: Conflicts with teachers or peers, changes in routine, transitions, provocation from peers, academic pressure, continued errors, ineffective problem-solving, teacher corrections. | | NOTE: Student trigger(s) may not always be observable. The trigger(s) may have occurred in another class or outside of school. If you observe a trigger, then: |
| | | Other triggers: Conflicts as problems, irregular sleepir substance use, gang activ | ng patterns, • | Problem-solve privately with student Engage student in lesson or activity |

| 3 | Agitation | Withdraws emotionally and physically; stares off; makes limited eye contact; short responses; complains of stomach ache or headache; mopes | Easily distracted; taps/drums hands or feet; hums, talks to peers | Engage student in lesson or activity Maintain calmness, respect, and detachment Remind student of expectations; then disengage temporarily to allow student time to comply Provide de-escalation strategy: Offer choice of activity, seating Prompt a short break Suggest relaxation activity (e.g., deep breaths) Provide positive reinforcement (e.g., praise) when student is back on task |
|---|-------------------|---|--|---|
| 4 | Acceleration | Avoids eye contact; puts head down; does not respond to teacher prompts or questions or prompts | Argues, questions; uses verbal abuse to intimidate; attempts to escape; may rip or throw objects | Maintain calmness, respect, and detachment Provide short, clear direction; then disengage temporarily to allow student time to comply Provide positive reinforcement (e.g., praise) when student is back on task OR Follow hierarchy of response if student does not comply |
| 5 | Peak | Shutting down; crying; curling up on the floor or in a corner; Does not respond to directions | Out of control behavior; Physical abuse toward objects or people; Does not respond to directions | Maintain safety of other students (e.g., room clear) Follow school procedures Call counselor or school mental health professional |
| 6 | De- escalation | Will respond to concrete directions; Attempts to reconcile; withdraws; Denies serious behaviors; Blames others; Attempts to justify behavior; Complaints of body pain | | Complete paperwork required by school Allow student time to cool down |
| 7 | Recovery | Engages in non-interactive activities, Reluctance to address the peak behaviors | | Prompt student to restore environment providing support if necessary De-brief incident with student and plan alternative student responses Return to original activity or next class Use high rates of reinforcement for appropriate behavior |

DE-ESCALATION WORKSHEET: EXAMPLE

Directions:

Think about the behavior of the target student at each phase of the Acting Out Cycle. Fill in the behavior on the left side of the chart. Then write in the teacher strategies that could be used during de-escalation.

| Student Behavior | Teacher Strategies |
|--|---|
| Calm Likes to pass out lab books Eager to work with a partner Enjoys collecting materials at end of class | Calm Praise; Ask him to be part of the —Lab Assistant TeamII with rotating responsibilities among class; Pair him with peer; Teach him classroom expectations and how to ask for help |
| Triggers Making errors on lab worksheets Running late from previous class (gym) Days when there is no lab When homework is assigned | Triggers For errors, pull him aside, show him items that need correction and give him chance to fix for half credit; Running late from gym class- have an Entering Class and Agenda routine so he knows where his materials are and what we are doing; No lab days/homework- Post a calendar of lab days & homework; Allow him to get a head start on homework in class in case he has questions. |
| Agitation Taps fingers, eyes dart around room; Heavy breathing; provokes peers | Agitation Prompt him to ask for help if he needs it; Remind him of task expectations |
| Acceleration Argues, refuses to follow directions, complains about assignments, rips up materials, | Acceleration Provide choice to work independently at round table or to work with paraprofessional; Privately prompt him to problem solve outside the room |
| Peak Kicks garbage can, storms out of classroom Uses obscenities toward teacher and peers. Pushes materials off desk with his arm | Peak Establish room clear procedures and teach the class; Inform all students the negative consequences to breaking materials; |
| De-escalation Refuses to accept responsibility for his actions | De-escalation Use problem-solving sheet to de-brief; focus on using self-management strategies before exploding |
| Recovery Eager to move on to business-as-usual Friendly, tries to do favors for teacher | Recovery Help him get back into routine by having him work on an easy task by himself for 15 minutes; remind him that he can make positive progress if he learns to communicate his feelings before exploding. |

Adapted from Walker, Colvin, & Ramsey, 1995.

PBIS in the Classroom - SYSTEMS

Adapted from Roundtable Practice Brief, Chicago Leadership Forum 2016 and Supporting and Systems to Support Teacher Implementation of Classroom PBIS, National PBIS TAC Brief, 2017.

What practices do you want to implement? Where are the practices implemented? Who are your implementation supporters? How will you support implementation?

Systems to support teacher implementation

Support for teachers' implementing PBIS in the classroom is typically provided in collaboration with a PBIS coach or another staff member with expertise in PBIS implementation. Processes for supporting teachers' implementation of PBIS in the classroom often include:

- (1) assessment of current practices and routines,
- (2) feedback and consultation,
- (3) professional development/training in implementation of new strategies or adjustment to existing practices,
- (4) action planning,
- (5) and measurement of the fidelity and outcomes of PCBS implementation.

Explicit professional development

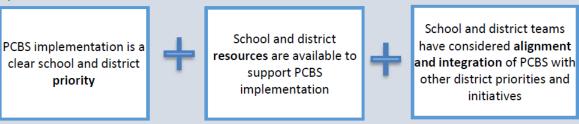

To develop systems to support implementation of PCBS, schools and districts must ensure PCBS is a priority, provide dedicated district and school resources, and consider alignment and integration of PCBS with other district-wide priorities and initiatives. To start, professional development must include explicit instruction (e.g., model, lead, and test) of practices. To support professional development, teachers need application and practice opportunities, with consistent support that is readily available upon request.

Coaching and performance feedback

Coaching and performance feedback that prompt teachers to use targeted strategies and provide data-based feedback are essential to support teacher implementation of PCBS. A building or behavior coach, mentor, or peer can provide support (e.g., coaching and performance feedback) for implementation of PCBS. A systematic coaching approach applies the three-tiered logic for capacity building of PCBS. The PCBS coaching approach ranges from Tier One supports, such as common professional development, self-assessments etc., to Tier Two supports such as professional learning communities, to individualized Tier Three supports such as coaching with performance feedback. Additionally, teachers, coaches, or "data collection buddies" will use self-assessments, classroom observations, or both to evaluate current teacher performance, and to identify teachers in needs of further support and evaluate teacher progress.

Guiding Questions for Systems to Support PCBS Implementation

1. Are foundational school-wide systems in place for all staff to enable successful implementation of PCBS?

If **yes**, proceed to question 2. If **no**, review content in <u>Table 1</u> related arranging the school environment for success.

2. Do all staff know what they are implementing and if they are doing it accurately?

Clear expectations and explicit training about practices that should be implemented by all staff.

If **yes**, proceed to question 3. If **no**, review content in <u>Table 2</u> related to effective professional development, coaching, and performance feedback before proceeding to question 3. If **unsure**, collect data on implementation (see <u>Table 3</u> for examples of data collection tools and uses).

3. Do data indicate that staff members are implementing PCBS effectively?

See upcoming Classroom Data Brief for more information on using data to guide decision making.
